Architecture Bachelor

WHAT DO I DO?

At Cie Gilles Jobin, he develops in a transversal way a series of activities; Studio manager, taking care of the setup of the Studio, the Motion Capture recordings and technical organization for every recording. Technical Artist & Designer, where I design and develop tools and systems that adjust to what the projects need, Motion Capture Lead, where I am in charge in all the animation pipeline that surrounds the Motion Capture, either for live events or standard recordings; resulting in the creation of **immersive interactive digital experiences**.

The work that Pedro has developed in the projects of Cie Gilles Jobin, Instituto Stocos, Zelia ZZ Tan and Rudi van der Merwe combines skills that can be translated between live digital performance and videogame creation.
